

THE PITSCO EDUCATION MISSION

Leading Education that Positively Affects Learners

WHO WE ARE

For more than 50 years, Pitsco has offered a comprehensive range of scalable hands-on STEM resources and curriculum. We help educators create learning environments that address all learning styles and help all students find success while tackling challenges, being creative, articulating ideas, and thinking with their hands.

WHAT WE DO

Pitsco's STEM products and curricula put a piece of the world in students' hands and ask, "How does this apply to your life?" – connecting classroom to careers to the everyday real world.

Our solutions give students a platform and structure to practice what is required in a 21st-century workplace and help equip teachers with the understanding and mindset necessary to manage this type of future-relevant learning environment.
